

## Houston Benefit Services Inc.

**Do you want to know where your health plan resources are going?** We believe you have the right to know more than what you are currently being told. Knowing how profitable the carrier is on your account is critical information you deserve to have when you make your decision as to which plan(s) to offer. Because of our special skills and understanding, we can perform two services that you need:

- In simple terms we can explain the role and relative value of each component of your plan.
- We can put you in a position of control and authority whereby we can develop a superior long-term strategy **to control costs without sacrificing quality.**

**As an ex-healthcare insider, private investigator and the chief designer of our healthcare strategy, my goal is to deliver truth, service and transparency to our clients. Our results have been extraordinary! Not just financially but from an overall satisfaction perspective.**

**Brian Davidson**  
Principal & Licensed Private Investigator

Most critical to our success has been our understanding of the marketplace. We understand everyone in the healthcare delivery chain: doctors, hospitals, drug companies, claims payers, governmental laws and entities, carriers and most importantly your participants...especially the sick ones!
